

VLUP®

Content:

Bearing structure in 3 parts

A. PANEL

B. FORK

C. BASE FOR SOFT SURFACES

- n.1 internal net
- bands for fix net and strips tie-wrap for net and lines fixing
- cushioning for the handle screws and nuts to fix the fork onto the base and the panel on top of the fork
- n.2 caps for the fork

ATTENTION:

In case of strong wind remove the PANEL (A) to prevent damage to objects or people and close the ends of the FORK (B) with the supplied CAPS to keep out sand, soil or water from the structure.

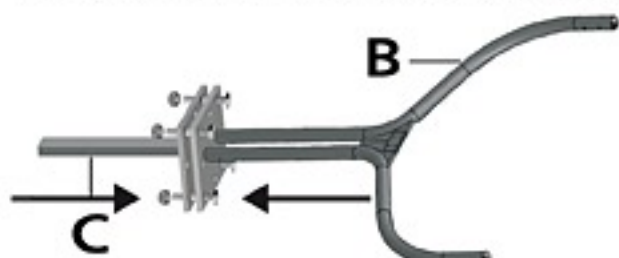

Strips and stakes KIT for 2 play grounds
(img. A - 2 x mt 10.00 - 2 x mt 5.00
2 x mt 4.85 - 2 x mt 2.35)

Fix the strips with the stakes and the bands starting from the central holes of the fork.

On soft surfaces (sand, grass, etc.)

- 1** Lie down the BASE (C) and the FORK (B) and assemble them using the supplied 4 screws, in the 4 holes in the corner

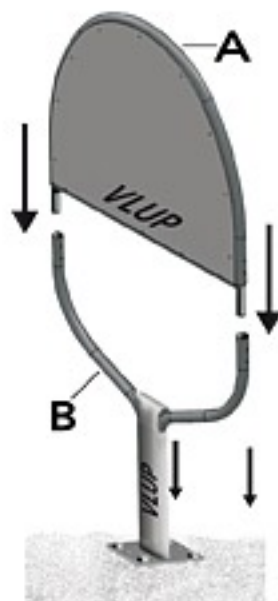

- 2** Dig a hole of 80 cm and insert the base of the BASE (C) into the ground and lay the VLUP down 80 cm underground

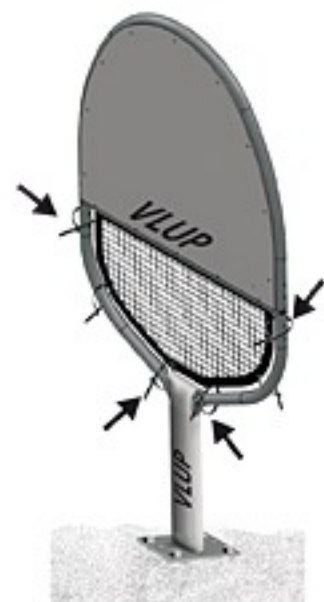

Images of this book are only demonstrative

On hard surfaces (cement) fix the VLUP fork to the ground surface

- 3** Insert the panel pivot (A) into the FORK (B) and fix the PANEL.

- 4** Insert the INTERNAL NET and fix it with bands and the hooks.

- 5** External dividing net (optional)
Fix the net onto the opposite hooks presents on the VLUP perimeter and onto any external devices

Periodically verify the correct installation and maintenance of VLUP and his accessory
